SUMMARY

Results-driven backend web developer with extensive experience in dynamic web project lifecycles. Proficient in developing robust, scalable, and maintainable web applications with a focus on backend technologies. Adept in PHP, JavaScript, MySQL, and database optimization, with a strong foundation in frontend development, project management, and customer relations.

EXPERIENCE

Robusta Studios, *Software Engineer - Backend PHP*

July 2024 - May 2025

- Specialized in developing, customizing, and maintaining Magento 2 e-commerce solutions.
- Proficient in module development, theme customization, API integration, and performance optimization.
- Designed and optimized database schemas, creating efficient SQL queries to enhance performance and resolve complex data issues.

Dubisign, *Backend web developer*

November 2021- November 2023

- Analyzed projects to identify and prioritize key concepts and implementation strategies.

- Collaborated with designers and frontend developers to deliver clean interfaces and intuitive user experiences.
- Developed project logic, maintained optimal workflows, and deployed projects to server environments.
- Guided development teams in managing large-scale projects and maintained communication with clients to meet their needs.
- Conducted quality assurance tests to ensure usability and resolve errors effectively.

Freelance, *Full stack web developer*

October 2019 - Present

- Designed and maintained web applications, including dashboards and performance optimization.
- Engaged with clients to deliver tailored solutions aligned with their requirements.

Createivo, *Web developer, Instructor and trainer*

February 2019 - October 2019

- Delivered hands-on training for aspiring web developers, covering web development tracks.

STRENGTHS
